

## **FACT SHEET**

### **About:**

Founded in 2009 by Dr. Holly Ellis, Ellis Dental is a state-of-the-art dental practice dedicated to providing its patients with comprehensive dental care that not only focuses on attaining their optimal oral health, but also incorporates their overall well being.

Ellis Dental serves patients of all ages, customizing all dental care to each individual patients' needs. In addition, the team at Ellis Dental is committed to creating a warm, welcoming atmosphere for its clients, which makes going to the dentist a pleasant and enjoyable experience.

With a goal of being the premier dental practice in the St. Louis region, Ellis Dental is committed to utilizing only the highest quality dental materials, operating state-of-the-art equipment and incorporating leading-edge techniques into every patient's visit to ensure the best possible outcomes.

Ellis Dental is located at 10296 Big Bend Boulevard in Southwest St. Louis County in more than 3,200 square feet of uniquely designed space which was completed in August 2015. When constructing the office, Ellis Dental engaged the renowned Unthank Design Group, whose founder, Dr. Michael Unthank, is both an architect and dentist. This collaboration allowed Ellis Dental to create an optimal atmosphere, to serve the needs of both its patients and its staff.

### **Services Provided:**

Ellis Dental provides a wide variety of general dentistry services to its patients including:

**Cleaning & Prevention** – including exams for gum disease, as well as teaching proper brushing and flossing techniques.

**Cosmetic Dentistry** – Ellis Dental is skilled at a variety of cosmetic procedures including bonding, fillings, porcelain crowns, porcelain fixed bridges, porcelain inlays and onlays, porcelain laminates, Invisalign clear braces, Venus at Home Whitening and Biolase Laser Treatment

**Implants** – Dr. Ellis is experienced with both tooth implants and implant dentures.

**Restorations** – services offered include fillings, porcelain crowns, porcelain fixed bridges, porcelain inlays and onlays, and root canal therapy.

**Tooth Extractions** – when needed, Ellis Dental provides routine extractions, as well as wisdom teeth extractions. In addition, Dr. Ellis and her staff provide specialized treatment options for tooth infections.

**Employees:**

Ellis Dental employs eight full-time and part-time employees in the St. Louis metropolitan area. These include highly skilled dental hygienists, dental assistants and front office personnel who are dedicated to continuing education and furthering the discipline of dentistry.

**Mission:**

Ellis Dental is committed to providing its patients the highest quality of dental care through excellence in clinical care and personal relationships. Through this our patients receive improved smiles while being guided toward overall health. Our purpose is also to have our work be an essential part of a lifestyle which will bring satisfaction and fun to all team members.

**Professional Affiliations:**

- Greater St. Louis Dental Society
- Missouri Dental Association
- American Dental Association
- Gateway Study Club (Chapter of the Seattle Study Club)
- Spear Study Club
- Academy of General Dentistry
- Crestwood/Sunset Hills Chamber of Commerce
- Missouri State University Alumni Association

**Philanthropy:**

Ellis Dental is committed to giving back to the community and supports a variety of philanthropic initiatives on an annual basis.

In 2009, Dr. Ellis traveled to Hutterfield, Jamaica on a volunteer dental mission. The trip, which was sponsored by The Thousand Smiles Foundation, brought oral health treatment to those in need. Dr. Ellis provided a variety of dental services free of charge to children and adults across Jamaica including cleanings, filings, sealants and extractions. The experience was extremely rewarding and inspiring. Patients lined up and waited in the Jamaican heat, often for several hours, to have their teeth cleaned and treated. Children were given informational pamphlets on how to maintain a healthy smile and were taught preventative oral hygiene.
